

## Configuring iOS for Tango Tango GPS Services

Configuring iOS devices to reliably provide location services can require correct setting of several different iOS options. This document describes the settings needed to maximize GPS performance with Tango Tango on iOS.

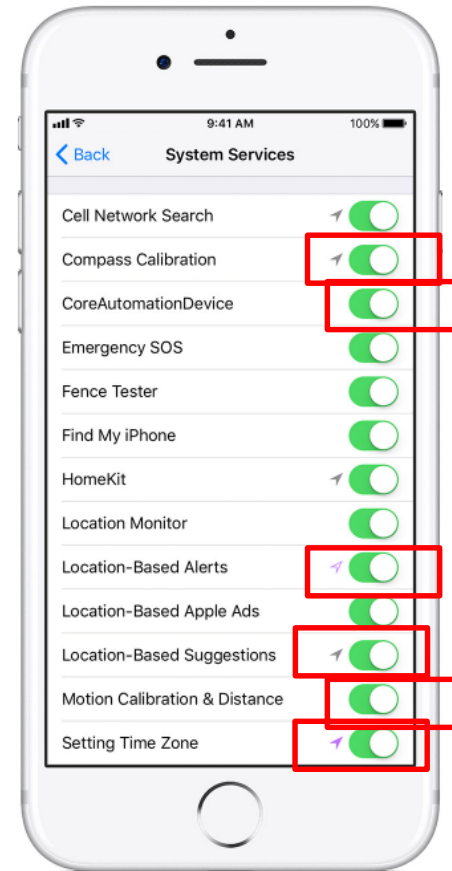

# App-Specific Settings

- Go to **Settings** > **Privacy** > **Location Services**
- Make sure that **Location Services** is on.
- Scroll down to find the Tango Tango app.
- Tap the app and select this option:
  - **Always**: Allows access to your location even when the Tango Tango app is in the background.

# System Services

- Go to **Settings > Privacy > Location Services > System Services**
- For those settings marked with red boxes on the figure shown here, ensure the setting is enabled on your device.

- **Settings > General > Date & Time > Set Automatically**
